Education

Hogeschool Utrecht Bachelor, HBO-ICT (Open-ICT)	2023-2028
ROC Flevoland MBO 4, Software Developer	2020-2022

Work Experience

Hogeschool Utrecht Student Assisant, Utrecht	Feb 2025-Present
• I help first year students with their programming assignments, questions about the Open-ICT system and give feedback on work. I've already learnt a lot about teaching and how to give better feedback to students.	
Jaspers Media Full stack developer, Amsterdam	May 2022-Aug 2024
• After my internship I was hired on as a developer here, during my gap year (-1 month). I was responsible for all critical bugfixes and pull requests as well as developing new features and making large preformance improvements, often being over 10%.	
Jaspers Media Intern Software developer, Amsterdam	Nov 2021-May 2022
• At the start of my internship I was mostly busy rewriting our websites luier.nl and flap.nl (with a complete redesign) from Innertia.js to a Nuxt 3 and Laravel app with a focus on SEO and preformance. • Near the end of the internship the rewrite successfully went live. • I frequently collaborated with other interns and coworkers new on the project and taught them how we work with Laravel and Nuxt being the one people went to when they couldn't figure something out.	

Hard Skills

These skills are roughy ordered by how comfortable I am with them, with the first being the most comfortable or experienced.

- **Languages:** Dutch (native), English (fluent)
- **Programming Languages:** PHP, JavaScript, Go
- **Frameworks:** Laravel, Nuxt, TailwindCSS, Echo (Go)
- **Tools:** Git, Docker, Asana, Figma, Jira, Azure DevOps
- **Databases:** MySQL/MariaDB, Redis, MongoDB
- **Other:** Linux, Nix

Soft Skills

- **Communication:** I am able to communicate clearly and effectively with my coworkers.

- **Problem Solving:** I am confident in my ability to solve problems quickly and effectively.
- **Scrum:** I am very familiar with scrum and its principles having used it at both my schools.
